

3D Tissue Paper Art

Have some tissue paper gift wrap lying around the house? Create some pet-inspired 3D art!

MATERIALS NEEDED:

- Crayons/markers/color pencils
- Glue stick
- Tissue paper gift wrap (optional amount)
- Pencil w/ attached eraser
- Scissors
- Blank paper, coloring page, or print out

PROCEDURE:

- Cut all of your tissue paper into small squares, about 1 ½ inches each.
- Create a large outline drawing of a pet of choice on your sheet of paper, or work on a printed outline/coloring page of choice.
- Color in any areas you do not plan on adding a 3D effect to.
- Use a glue stick to apply some glue on a small area of the drawing.
- Take one piece of tissue paper and wrap it around the eraser part of your pencil, then stamp it onto the small section of paper that you just covered in glue.
- Repeat this gluing and stamping process until your picture is filled in as much as you would like, giving your drawing a 3D look.
