

## Container Treat Dispenser

Make this quick and simple treat dispenser to provide some fun enrichment for your dog.

### MATERIALS:

- Food Container
- Scissors
- Treats
- Tape

### STEP 1:

Wash and dry container.

### STEP 2:

Decide where you would like your treat dispensing holes to be. You can add holes to the top or to the sides of your container or both). To make it easier for your dog, cut more and/or larger holes. To make it more challenging, make them smaller or cut fewer. You can experiment, but make sure that they are large enough for the treats or kibble to fall through.

### STEP 3:

Squeeze the container and use scissors to cut holes on the side of the container. It may be easier to cut a hole in the top of the container if you do so when the top of the container is taken off.

### STEP 4:

Place the top onto the container and tape down to secure.

### STEP 5 (optional):

decorate with non-toxic paint, markers, or construction paper.

### STEP 6:

Place dry kibble or treats in the container and give to your dog to enjoy.
