

Obstacle Course

When it comes to providing some fun and enrichment for our pets, the more options to choose from, the better! Make this fun cardboard obstacle course for your own dog.

MATERIALS:

- Empty boxes (all sizes and shapes are acceptable)
- Scissors
- Tape
- Treats

STEP 1: Gather your boxes. The more the better.

STEP 2: Design your course based on the number of boxes you have. You can place the boxes in a line for a simple course or create a more challenging course by laying out the boxes to form a maze.

STEP 3: Once you have laid out your course, tape your boxes together. Depending on the gracefulness of your dog, this step may not be necessary. If you choose not to tape the boxes, you can rearrange and play again.

STEP 4: Once you have chosen the layout of your boxes, it is time for your pup to enjoy the course! You can choose to lure your dog through the course using treats, or toss small treats in each box and allow them to explore on their own.
